High-Quality Floor Surface For New Bonded Warehouse

The Concrete Grinding Group has completed a £170,000 contract to upgrade the floor in a new 6000m² bonded store for Seabrook Warehousing Ltd, one of the UK's leading logistics companies for the licensed trade.

Fine wines are among the wide variety of products held at the VNA warehouse at Chadwell Heath, Essex, making careful handling a high priority, together with the safety and efficiency of the man-up trucks used for stock replenishment and order picking. Upgrading the floor was carried out as part of a complete refurbishment of the building to produce high-quality storage facilities.

The 14 aisles in the VNA part of the warehouse, each 50 metres long and 1750mm wide, were ground across the full width to the Concrete Society's TR34 Category Two standard, using Concrete Grinding's LASER GRINDER[®] system. The ground track, which also allowed space for the guide rails, produced a finished surface that was well within the requirements of the specification.

After shot blasting and priming, Concrete Grinding installed a 10mm thick pumped cementitious

screed *Fastfloor-IT* in the free movement transfer area and block stacking areas to produce a hard-wearing heavy-duty surface.

Once the aisle grinding and screeding were completed, the entire floor was coated with a coloured epoxy coating.

May 2006

Client:	Seabrook, UK
Concrete Grinding	
Solution:	Whole width grinding, screeding and coating.
Floor Area:	6,000m ²
Floor Specification:	TR34 Category 2
