Global Flooring Solutions

CG Successfully Completed Large Joint Repair Contract

Concrete Grinding Ltd (CG) has just successfully completed a large joint repair contract at Howden Joinery in Northampton. Howden Joinery offers a range of kitchens and joinery products, complete with a full range of accessories.

CG has established a long standing and extremely good relationship with Howden Joinery for over 10 years. Some of the joint repairs at the Howden Joinery premises in Northampton are over 10 years old and are as good now as the day they were completed. This is something CG is extremely proud of. If Howden have had any problems with their floor they have had the confidence to call in CG to offer advice and perform any repair work necessary. This has been seen as a rolling maintenance

programme.

Recently, CG was called in to take a look at joints to several internal roller shutter doorway thresholds and many wide aisles. In total CG repaired over 70 linear metres of arris repair and resealed over 40 linear metres of joint. The 2 man CG team worked in full cooperation with the client to minimise any inconvenience to the fully operational warehouse facility.

Once the project was underway, CG was asked to work over a weekend so that the floor would be ready for use the following Monday morning. This was not a problem for CG, who worked over the weekend to ensure that the client would have a fully operational floor as required.

This contract is a prime example of how CG is able to perform various repair work to a clients' floor at minimal inconvenience. When a user has a tight schedule and cannot shut down their operations, CG can step in to solve the floor repair issues with little or no disruption. With over 20 years experience in their field, CG work closely with the client to provide the best service possible and at the same time maintaining a good working relationship.
